TOWN WILL HAVE CLEAN-UP DAY—REFUSE REMOVED FREE

Meeting of Council on Tuesday Night Appointed Wednesday, May 12, for Renovation—Wagons Will Call at 7 o'clock on Thursday Morning

A special meeting of the town council was held in the clerk's office last night. Mayor Hewson was in the chair while Reeves Mennell, Aldermen Durham, Ponger, McKee, Moxley and St. John occupied seats at the board. Patterson of the Imperial Oil company, was present with a view to selling road oil.

Moved by Reeves Mennell and seconded by Alderman Ponger that the clerk be instructed to order a 6000-gallon car of oil from the Imperial Oil company at 18¢ cents per gallon delivered at Grimsby, and sales tax included.

The question of going over the town streets was taken up, and it was decided to make the inspection on Saturday afternoon starting at 1 o'clock.

The mayor had a suggestion to bring before the council. He thought

that Grimsby should have a clean up day. He would appoint a day and advise the fact that all cans, junk, etc., left on the edge of the street in boxes on that morning be removed free of charge. Then it would be in line for the town to pass a bylaw to provide for the collection of garbage regularly.

After a short discussion it was decided to have the teams start collecting on Thursday morning May 13, and it was suggested that Wednesday May 12, be a general clean up day. An advertisement has been inserted in this issue, and householders will do well to take advantage of this opportunity to get rid of refuse. It must be in boxes or other containers so that drivers can readily dump it into the wagons. Ald. Ponger and Reeves Mennell made the motion covering the matter.

HUGH D. WALKER GIVES FOUNTAIN

A couple of weeks ago Superintendent Randall had men working on the water main leading into the Public Library, and while they were at the work H. D. Walker, of Metal Craft, passed. He stopped for a moment and remarked that that would be a nice place for a drinking fountain. Mr. Randall coincided with Mr. Walker's view to the extent that an offer was made by Mr. Walker to supply a fountain if connection would be made. And now it stands on the street line at the Depot street side of the library as an ornament to the place and a credit to Mr. Walker's foresight and desire to see Grimsby advance. A cement curbing extends from the walk to the fountain, and the overflow goes directly to the storm sewer.

FROST DOES NOT DO ANY DAMAGE

The frost on Monday night so far as can be learned has done no damage to fruit. Several inquiries among prominent growers failed to discover one who thought any damage had occurred, while many were quite satisfied that none had. G. M. Beamer who is located on the mountain was of the opinion that no damage had been done on the hill as the buds were not far enough advanced. Prof. J. A. Neilson at the Vineland Experimental station, when asked regarding damage in that vicinity said that there were but three degrees of frost registered, and the buds were not far enough advanced, in his opinion, to be susceptible to that much frost.

PAGE AND HIS PARTNER ARE REMANDED FOR ONE WEEK

Men Who Attempted To Rob Universal Garage Last Week Have Many Charges To Face—One Who Gave Name of Jack Nye Found To Be Ted Lucy—No Evidence Taken.

A remand of one week was given Ted Lucy alias Jack Nye, and Albert Page when they appeared before Magistrate Campbell at St. Catharines on Tuesday. No evidence was taken. Lucy and Page are the two young men who were arrested in Grimsby on Tuesday last week while attempting to get gasoline at the Universal garage.

It now transpires that the same pair are supposed to be implicated in several other cases that police have been investigating. Seventeen charges have been laid at Crystal Beach and it is said that a reward of \$750 has been offered by the residents there for the apprehension of the guilty pair.

Chief Clark, of Westworth County, also has some counts against them, and Lucy and Page are supposed to be at least some of the bandits wanted.

London police have some goods that it is believed these men had stolen, and taking it all around it looks as if an important capture had been made.

In police court yesterday Magistrate Campbell read three separate charges against Lucy, and two against Page. When asked by the Magistrate if he had any counsel, Lucy said he had not, and intimated that he wanted none. Norman Kay, of Hamilton, is acting for Page but was not present at yesterday's court.

FULL REHEARSAL

What would a good show be without an added attraction? At a dress rehearsal of The Grimsby Follies last night Mr. Jack Swinerton, of Hamilton, was present. Mr. Swinerton would take part in three numbers in The Follies show tomorrow and Friday nights. Mr. Swinerton will be remembered as being one of the hits in The Follies last season.

The costumes supplied by McKenna, of Toronto, are splendid, some gorgeous, some fetching, while the dancing and figures are very attractive. It is announced that the plans for both Thursday and Friday nights will close at six o'clock each night and no reservations will be made later. That is, anyone buying tickets after that hour will come under the rush seat method.

GETS RESULTS

T. E. Mennell had an advertisement in The Independent last week asking for about five acres of fruit land, and among his replies was one from Los Angeles, Cal. The Independent reaches far and gets results.

MRS. WILLIAM BOOK PASSES IN HER NINETY-EIGHTH YEAR

Another link with the long past of the Grimsby district, in the person of Mrs. Sophia Ann Book, died on Tuesday evening May 4, 1926, at the home of her daughter, Mrs. Egbert Smith, at The Fifty.

Mrs. Book was born in the house now occupied by Alex. Glover, one and a half miles west of William Stevenson and Jane Anderson. In 1839 the family moved to Grimsby township and on May 10, 1848, she was married and on May 10, 1848, to William by the Rev. George Groat, of Grimsby, when they went to reside on G. Book homestead, now the home of G. Book, and lived there in 1888, Mr. half a century, and where in 1898, Mr. and Mrs. Book celebrated their golden wedding.

DROP IN PRICE

At a meeting of the North Grimsby wholesale milk producers, held on Tuesday evening last it was decided to drop the price of milk for the summer months, commencing May 1, to \$2.06 per cwt or \$1.70 per 8 gallon can delivered. These prices are to be in force until September 1. Toronto and Hamilton producers have also decided to drop their prices but they do not go into effect until June 1. At the meeting John E. Hurd, of Grimsby, was elected chairman of the producers, while George Warner, of Smithville was elected secretary.

MOVES OFFICE

T. E. Mennell, who for some time past has had an office at Moxley's store on Main street, has opened up a new and up-to-date office at 23 Main street. Mr. Mennell has remodelled the entire office, putting in a new window as well as re-decorating the interior and adding new counters, etc. He will in future conduct his real estate business from his new quarters.

There are 174,947 one-teacher schools in the United States.

PRESBYTERY AND GRIMSBY CALL

Hamilton District Body Sustains Call to the Rev. H. S. Graham by St. Johns Presbyterians

Hamilton, May 4.—The Hamilton Presbytery of the Presbyterian church received communications today in which permission was sought to allow several ministers of various denominations to enter the Presbyterian church. One of the ministers in question was Rev. A. Robertson, R. A. of Maple Creek, Saskatchewan, a former incumbent of the United church.

Rev. Dr. J. A. Woodside of Burlington feared that a vote would have been recorded to determine the ownership of Knox church there. Rev. W. F. Blake said that the congregations were not considered to be in the United church. Both groups were preparing for a vote.

The Presbytery decided to give financial assistance to the missions in West Nile and Stoney Creek. Confirmation was accorded the call from St. Johns church, Grimsby, to Rev. H. S. Graham of Belle River. The Presbytery was heartily in sympathy with the work being done by Rev. Frank L. Kovacs among Hungarians.

Rev. Dr. G. G. MacRobbie was tendered a complimentary luncheon by the Presbytery on the occasion of his eightieth birthday. He was ordained at Mandanville, Kansas Presbytery 33 years ago. Dr. MacRobbie was absent from his pulpit only one Sunday during that period. He was made the recipient of a fountain pen.

RADIO CONCERT

The Grimsby hour broadcast from CKOC, Hamilton, last Saturday afternoon between 5:30 and 6:30 was a treat to all lovers of music, both classical and popular. The Moonlight Serenade orchestra played Oh, What a Girl! Always; Let's Grow Old Together; and Let's Talk About My Sweetie Now, in a fashion which would have reflected credit on a much more experienced group of artists. Bob Hillier sang The Bread Highway, Trees, The Gay Highway, and Lassie O'Mine, in his usual manner. Miss Mariel O'Neil's piano solos: Le Pappillon, and An Matin, were a treat to lovers of the piano; and her accompaniments for the singers were splendid. Miss Doris Beamer, an all-time favorite, delighted the listeners with her wonderful voice, rendering My Prayer, How Many a Lonely Cry, and Danny Boy, to perfection.

The Grimsby Hour is looked forward to by the music lovers of the district, it being a pleasure to listen to artists from home whom everyone knows, especially when their efforts meet with such marked success.

MOTHER'S DAY IS SUNDAY, MAY 9TH

ORIGIN OF MOTHER'S DAY

The Mother's Day suggestion is attributed to Miss Anna Jarvis, a Philadelphia woman, to whom the idea came when she was asked by the superintendent of the Sunday school in the Virginia town in which her deceased mother had long been a prominent woman to arrange a memorial service. The plan was followed in many parts of the country. It is always the second Sunday in May. The purpose of the day is to offer an occasion when the people may give public expression of their love and reverence for the mothers of the country. The day is generally observed by the wearing of a white carnation or a colored carnation or other flower by sons and daughters in honor of their mothers.

FALLS OVER BANK

Niagara Falls, Ont., May 4.—Falling 50 feet into the Niagara Gorge today, William Lyle, 16 years old, of this city, had a narrow escape from death. Lyle was walking along a pathway at the top of the bank, when he slipped and plunged over the cliff. He took a sheer drop of more than 50 feet and then struck some shrubs, which broke his fall and prevented him from rolling the remaining 150 feet to the top of the bank by rescuers and taken to a hospital, where it was said that he was badly bruised and suffering from shock. No bones are believed to have been broken.

CITIZENS WILL TAKE NOTICE

The Council has proclaimed Wednesday, May 12, as "GENERAL CLEAN UP DAY" and requests all citizens to clean up their back yards and have all refuse put in receptacles that can be dumped in the wagons, and placed on the curb where the town teams will call and remove it free of charge. All decayed or unsanitary refuse must be put in separate receptacles. The teams will start Thursday morning, May 13, at 7 a.m. to make the collection. Have everything ready, as this will be your only opportunity to get your refuse removed free of charge.

W. F. RANDALL, Sup. of Works.

AT RIPE AGE

SOPHIA ANN BOOK

Who died on Tuesday, May 4, in her ninety-eighth year

CAR TURNED OVER

On Wednesday last while driving a little south of Hiramark, Ed. Robbins, of Robins Iron Rooms, had the steering gear break and the car wrecked in the ditch. The auto, a Studebaker roadster, was traveling at a moderate speed when without warning it plunged into the ditch and turned completely over. Robbins was uninjured except for a slightly cut hand, and Miss Madelyn Anger, who was also in the car on her way to her home in Dunville, received a couple of bad bumps on her head.

CAR STOLEN

While at church on Sunday evening W. H. Pettit parked his auto on St. Andrews avenue, but when he returned he found it gone. It is reported that the car had been recovered at Caledonia.

Wagons have always been more protected in Bible lands than elsewhere.

FOUND DEAD

Albion Wardell, of Beamsville, about 72 years of age, was found dead in bed at noon on Wednesday last, apparently having died some time during the night.

Mr. Wardell had been living alone in rooms in the Coombe block, and a neighbor, Mrs. McDougall, noticed that a room usually locked when Mr. Wardell was out, was open. At first she thought he had forgotten, but when he did not come in for dinner, thought he might be ill.

On going into the room, Mrs. McDougall was horrified to find Mr. Wardell lying lifeless in bed.

Dr. Elmore, the coroner, was summoned and stated that Mr. Wardell had been dead several hours when the body was found.

SUDDEN DEATH

While unloading his horse after the day's work at Stoney Creek on Saturday evening, Sylvester G. Smith, a highly-respected resident of the community, fell to the ground and was dead when found some time later by Mr. Smith. Dr. J. A. Robertson, after an examination, said that death had been due to heart failure. The deceased was in his 65th year and had been a resident of Stoney Creek for the past eight years, coming there from Bradford, where he had been in the employ of the Stoney-Creek company for 28 years. Left to mourn his untimely demise are his widow and two daughters, Miss Alice, at home, and Mrs. D. W. Berry, of St. John, N.E. The funeral took place on Tuesday, interment being made in Bradford, after a service in the Stoney Creek United church.

DR. G. C. CREELMAN C.S.T.A. PRESIDENT

Ottawa, May 1.—Dr. G. C. Creelman, of Beamsville, Ont., formerly president of the Ontario Agricultural college at Guelph, was elected president of the Canadian Society of Technical Agriculturists, according to the announcement made last night by Fred H. Girdley, secretary. The vice-presidents are: H. W. Arkell, Dominion live stock commissioner, Ottawa, and L. P. Roy, chief of the field husbandry division of the Quebec department of agriculture. L. H. Newman, Dominion cerealist, Ottawa, was re-elected honorary secretary. The sixth annual convention of the society will be held in Ottawa from June 23 to 28.

HIGHLY HONORED

An item from the Salem, Oregon newspaper reads as follows: Miss Gladys McIntyre, daughter of Mr. and Mrs. Ora McIntyre, and senior at Willamette university, was appointed by Governor Pierce this morning, as the first Oregon singer to represent the state at the Philadelphia Sesqui-Centennial to be held there in July of this year. For the past few years Miss McIntyre has been soloist for the Willamette university girls' glee club and she received the diploma for completion of the course in voice training at the Willamette school of music last June. She will be soloist for the Willamette May Festival this year.

Miss McIntyre is a granddaughter of Mr. and Mrs. G. W. Sibbald, Ontario street, Grimsby.

ANNIVERSARY

For the 10th Anniversary of the I.O.O.F., Grimsby Lodge No. 269 and Alexina Rebekah Lodge, will celebrate on Sunday evening next, when they attend divine service in the Baptist church. Rev. T. E. Richards will conduct the services.

STILL HAVE PREMIUMS

Members of the Grimsby Horticultural society who omitted to call for their spring premiums on Saturday next May 8, at Sims Hardware, unless previously ordered only Gladiolus bulbs will be supplied now, or bedding plants on Saturday May 29. Requests for the latter must be given to the secretary not later than Saturday next May 8.

Silk worms were first domesticated by the wise men of ancient China.

BOOK HOMESTEAD IN NORTH GRIMSBY
Where Mrs. Sophia Ann Book, who died yesterday, lived for over fifty years, and where she celebrated her golden wedding in 1898

NEW PASTOR IS INDUCTED AT ST. JOHNS UNITED CHURCH

Colonel the Reverend George W. Wood Takes Charge of Local Congregation—Large Assembly and Impressive Ceremony—Had Received Unanimous Call

On Thursday night, April 23, the congregation and friends of St. Johns United church filled the auditorium of that edifice, to witness the induction of a new pastor, the Rev. George W. Wood, formerly of Ingersoll.

The impressive induction service of the United church of Canada was used and the ceremony was in charge of the presbytery of Niagara. Rev. Pae-Gilchrist, of St. Catharines, Orr Bennett, of Vineland; C. L. Poole and J. C. Nicholson, of Grimsby, being the officiating clergymen.

The Rev. Pae-Gilchrist presided, and after the opening exercises preached an eloquent and forceful sermon from a text taken from Ephesians II, "God's grace is sufficient." He then called on the Rev. J. C. Nicholson, acting interim moderator, who related the steps that had been taken since Mr. Smith's removal to Ottawa last December to fill the vacancy. The congregation had listened to seven candidates, and at the final meeting to extend a call, for which the required two weeks' notice had been given, the Rev. George W. Wood received 86 of the 94 votes cast; the call was therefore extended to him and he accepted.

The pastor-elect was then called forward, and after the prescribed questions had been put and satisfactorily answered, the presiding officer, by the authority vested in him by the presbytery of Niagara of the United church of Canada, formally inducted him into the pastorate of the church, and the right hand of fellowship was extended the new minister by the members of the presbytery. Following the usual custom, the Rev. Orr Bennett, of Vineland, addressed some

words of sage advice to the new minister, and the Rev. C. L. Poole, of Central United church, Grimsby, addressed the people, pointing out their duty to their pastor, pleading for loyal co-operation and a devotion to the task of the church, and urging faith in the pastor and what he stood for. Mr. Poole also took occasion to convey hearty greetings and best wishes from Central, the sister church in Grimsby.

A pleasant interlude was the reading by David Allan of a telegram conveying greetings from the former pastor, his wife and daughter, Rev. F. S. and Mrs. Milliken and Catharine. Mr. Allan also spoke of the good work done for the congregation by Rev. J. C. Nicholson during the vacancy, and a slight token of appreciation, handed him a cheque on behalf of the board of stewards.

At the reception and social hour which followed the service, a dainty buffet luncheon was served by the ladies of the congregation, and all present had an opportunity of meeting Col. and Mrs. Wood.

The congregation of St. Johns United church are a unit in their belief that they have secured an outstanding man in their new pastor. He has had a distinguished career, both in the military and in overseas service during the war. He went over with the originals from Valcartier, served for duration and returned in 1919 with the rank of colonel. He is a graduate in arts and theology of Dalhousie university, and his first two charges were in Amherst and Chatham, N.B. On his return from overseas he accepted a call to Ingersoll, where he has been up until the time he accepted the call to Grimsby.

CHAMBER OF COMMERCE TO BE AN ACTIVE FACTOR IN GRIMSBY

Reorganization Meeting on Thursday Night Results in All Present Signing Roster—Spirit of Optimism in Chamber and Future of Town Is Shown

With J. R. Hastings in the chair at a meeting called for last Thursday night to reorganize the Grimsby Chamber of Commerce, twenty citizens put their names on the roster and each one in signing felt that his name would be but one in not only that twenty, but in many more twenties.

Such was the spirit of the meeting, and though but this twenty was all that had responded it did not prevent optimism on the part of those attending.

There will be a new Chamber of Commerce and next Monday night will see an organization that will be a credit to Grimsby.

After preliminaries had been dealt with and those present signifying their intention to join and take an active part, it was decided to call a meeting of business men and citizens in general for Monday evening, May 10, complete organization, elect officers, and go further into the question of blossoming week.

The chairman, in his opening remarks gave it as his opinion that the district was on the eve of an era of great prosperity which, when it came should be taken full advantage of. For this purpose a good, live chamber of commerce was an absolute necessity. His experience had been that a bustling town usually indicated a bustling board of trade or chamber of commerce and at this juncture he felt that there were a great many ways in which Grimsby might be benefited by such an organization. Other speakers, members in former years, while

heartily in favor of the idea, stressed the importance of finding and appointing good, live officers, especially a president and secretary, who would be willing to give unselfishly of their time and energy to carry on the work. If these could not be found it would be better to get along without a chamber of commerce at all. It seemed to be the opinion of those present, however, that such men can be found in the community, for all were in favor of going ahead and promised to take out membership in the revived organization. Reeves Mennell and J. R. Hastings, C. W. F. Carpenter, Henry Hillier, C. J. James and W. Chivers were elected a committee to solicit new members who, with the ones already pledged will meet in the council chamber on Monday, May 10, at 8 p.m., and elect directors for the ensuing year.

Beamsville board of trade sent two representatives to the meeting who participated in the discussion that followed regarding the promotion of Blossom Week. It was indicated that the feeling in both towns is that, in spite of the fact that both Hamilton and St. Catharines are definitely out of it, the idea should not be abandoned and by resolution the meeting went on record as being in favor. Beamsville board of trade will be asked to appoint five of their members to act with a like number from Grimsby chamber of commerce as a joint committee to devise ways and means of carrying on without the co-operation that was enjoyed in former years.

T. H. & B. CHANGES

The T. H. & B. railway is making big changes in its schedule this spring. Principal among them are the changing of the western connections and the speeding up of the Buffalo business. The new changes call for four and a half-hour run to Detroit, making connection with the crack Michigan Central trains at Waterford. The new service will mean that the fastest time ever made between the two points will be made, an average speed of 43 miles an hour being maintained. The Buffalo trains are nearly all being speeded up five minutes.

"We are making a big bid, not only for Detroit business, but for all western business," declared an official explaining the changes. "Bradford has complained for years that it could not get to Hamilton over our line until early afternoon. Now we have a service which will enable them to catch the evening train to Toronto and our later morning train enables them to make C. P. R. connections."

The T. H. & B. is now making its daily trip between Port Huron and Astoria, the line having cleared sufficiently to permit navigation.

IN MEMORIAM

Staff Sergeant W. H. Proctor, 4th Battalion, killed in Belgium, May 3rd, 1917.
Pte. S. H. Proctor, aged 18, killed at Vimy, May 10th, 1917. Also Beatrice Rebekah Proctor, October 10th, 1920 (son and daughter of above).
W. Bowers, A. D. S. killed at Zeebrugge (a brother-in-law).

SALTFLEET SUIT

The township of Saltfleet has been served with a writ for \$48.00 for hauling stone on Ridge road by Stanley Carpenter.

Last year a petition was circulated the signatories to which agreed to haul the stone gratis if the township would fix the road. Mr. Carpenter did not sign the petition but had a team at work.

It is alleged that the men quit before the job was complete and that the township hired teams to finish the work, hence the suit. The council denies liability.

ATTEND DINNER

The Hamilton district section of the National Grocers association held a get together dinner at the Royal Connaught hotel in Hamilton on Monday night, when several Grimsby grocers attended. James I. Theal, Richard T. Theal, Willy Theal, Wm. Chivers, J. Hardy and C. J. Love were among those from Grimsby.

DIED

BOOK—At the home of her daughter, Mrs. E. M. Smith, Winona, on Tuesday May 4, 1926, Sophia Ann Book, widow of the late William Book, of North Grimsby, in her 98th year. The funeral will take place on Thursday, May 6, from the residence of E. M. Smith, The Fifty, meeting at the home at 2 p.m., thence to St. Andrews Anglican church, Grimsby, where service will be held. Interment in St. Andrews cemetery.

UNSEASONABLE WEATHER IS CAUSE OF WORRY IN WINONA

Farmers in That District Three to Four Weeks Behind in Work
—Dr. Lee Goes to Indianapolis — Mrs. Martin Again President of Fifty Ladies' Aid

(From Our Own Correspondent)
Winona, May 5.—Continued unseasonable weather extending into a time when growth should show marked development is causing some uneasiness among the farmers, many of whom are from three to four weeks behind in their work. Last Sunday, when the mercury here climbed as high as 83 degrees, it was thought that the backwardness of spring had come to an end but this hope was dispelled on Monday when the temperature overnight fell to 40, a severe drop of more than 50 points.

Goes To The States
Dr. W. W. Lee has received notice of his appointment to the office of epidemiologist for the state of Indiana an important post in connection with the extension of public health work. The office, recently created, establishes contact between the Indiana board of health and the various state-wide activities. Though a date for the commencement of his new duties has not as yet been set, Dr. Lee, whose headquarters will be at Indianapolis, expects to leave Winona in the near future.

Mrs. Martin Re-elected
Mrs. E. E. Martin was re-elected president of the Fifty Ladies' Aid at the annual meeting of that organization last week. Mrs. R. O. Y. Almsie was elected first vice-president; Mrs. J. W. Hunt, second vice-president; Mrs. P. B. Henry, treasurer and Mrs. A. M. Cook, secretary. Annual reports were highly gratifying to the membership and showed a substantial sum raised by the ladies during the year. On conclusion of business tea was

served by the hostess, Mrs. Martin, who was assisted by Miss Beatrice Dwyer and Miss Helen Bridgeman.

TO PAVE LAKE AVENUE
It is understood that the suburban area commission will this summer include Lake Avenue, Stoney Creek, in its list for permanent pavement, and that tarvin, similar to that on King street, will be laid. The work will cover the road between King street and the provincial highway. In connection with roads the H. G. & L. railway will start renewing its roadbed through Stoney Creek, and this will permit the placing of the main street in a more passable condition.

If present arrangements are realized, activities of the new Horticultural society at Stoney Creek this summer will be rather extensive. Among other things plans are under way for the beautification of King street, and in this respect a committee is asking the suburban area commission for permission to carry on the work. The society, entrusted with the care of the soldiers' memorial grounds at Fruitland, has already made a start in that location and promises considerable improvement before long. A number of contributions have been offered to provide for the beautification of the local school grounds, and while it is a large undertaking, the executive plans to do all the preparatory work this season as well as set out a few flower beds.

Notes of News
Fred Woodcock has acquired an additional fifty feet frontage adjoining his former purchase of a lot on Station road at the corner of Barton street.

Mrs. Adam Iach was a guest at the regular meeting of the Winona women's institute last Thursday afternoon at the home of Mrs. Downs. The next meeting will be held at the home of Mrs. E. O. Smith on Thursday afternoon, May 27.

Rev. C. A. Bridgeman and family, recently returned on furlough from the mission field of China are at the home of R. O. Y. and Mrs. Almsie.

It is understood that the suburban area commission is to pave Lake Avenue at Stoney Creek this summer. The newly organized horticultural society at Stoney Creek has taken charge of the soldiers' memorial monument grounds at Fruitland for upkeep and has already made a start at further beautification of the place.

Miss Ellen Kilsley has been elected president of the Stoney Creek Tennis club and Tom Roderick, captain.

St. John's Tennis club is meeting in

the hall tonight to reorganize for the present tennis season.

Rev. T. R. Todd, of Harrison, Ont., son-in-law of C. J. and Mrs. Carpenter, has received a call to the Mount Hamilton United Church.

The women's missionary society will meet in Fifty church tomorrow (Thursday) afternoon at 3 o'clock.

J. H. Smith and family have returned after spending the winter months in Hamilton.

Fifty church Sunday school, though in existence for more than half a century will hold its first anniversary service on May 20 and 21.

The Continuing Presbyterian hold their inaugural service at Stoney Creek last Sunday afternoon and more than forty were present.

THIRTY MOUNTAIN

(From Our Own Correspondent)
The concert given under the auspices of the Junior Aid, held in the church on Thursday night, was well attended and enjoyed by everyone. Credit should be given to all members taking part in the play, also to the piano who assisted between the acts. The receipts taken in at the door were splendid indeed.

Mr. and Mrs. E. F. Hurst, Mr. and Mrs. Lloyd Hurst and baby Lawrence, spent Sunday with Mr. and Mrs. A. M. McIlwain, Grimsby.

The Ladies Aid held at the home of Mrs. McCrae on Wednesday last was well attended and a very enjoyable afternoon was had by all. It was decided to have an apron and tea towel shower for the next one, which is to be the evening of the last Wednesday in June.

Mr. and Mrs. Lloyd Hurst spent Friday afternoon with Mr. and Mrs. C. Konkle, of Beamsville.

Mr. and Mrs. Bert Hurst spent Sunday with Mr. and Mrs. Delos Hurst.

Harold Astor, G. Clark, James McCrae and friend of Niagara Falls, N. Y., and Miss Ruth McCrae attended the Junior Aid concert on Thursday night.

Mr. and Mrs. A. H. Hurst spent the week-end in Ridgville, with their daughter, Mrs. Aaron.

Mr. and Mrs. Wm. Hurst, of Hamilton spent Sunday visiting on the mountains.

Friends and neighbors gathered at the home of Mr. and Mrs. Joe Sobye last week. The evening was spent in euchre after which a very dainty lunch was served. Mrs. Lloyd Hurst won the ladies first, and Wm. Kemp the gent's first, W. J. Carson and Jack Coomber the consolation.

Mr. and Mrs. Wm. Kemp spent Sunday at Welland.

A number from here were at the surprise party given to Mr. and Mrs. H. Canning, of Beamsville. The evening was spent in euchre after which a lovely lunch was served.

Richard Scott was home, from East Aurora, N. Y., over the week end.

Grimsby Centre East
(From Our Own Correspondent)
John Groat, of Calver, spent Sunday at the home of his daughter, Mr. and Mrs. R. C. Mackie.

Mr. and Mrs. Ernest Grant were guests of Mr. and Mrs. Wm. Page, of Smithville, on Sunday.

Mr. and Mrs. R. C. Mackie were the guests of Mr. and Mrs. James Stevens, of Grimsby on Sunday.

Mr. and Mrs. James Mackie spent Sunday at the home of Mr. and Mrs. Joe Marlowe.

Mr. and Mrs. W. E. Field were guests of Mr. and Mrs. John Johnson on Sunday.

Mr. and Mrs. Chas. R. Mackie were guests of Mr. and Mrs. Joe Marlowe over the week end.

Miss Margaret Gibb spent Sunday at Miss Martha Johnson's.

Claude Street, of Thirty Mountain, spent Sunday with his grandparents, Mr. and Mrs. Wm. Bowman.

Miss Flo Johnson was the guest of Mr. and Mrs. M. V. Johnson on Sunday.

Mrs. R. C. Mackie and Mrs. K. Grant, visited at the home of Mrs. C. A. Field one day last week.

Mr. and Mrs. Wm. Bowman spent Thursday evening at the home of Mr. and Mrs. J. P. Sweet, of Thirty Mountain.

R. C. Bowman spent Thursday in St. Catharines.

Oscar Raymond spent the evening at the home of Mr. and Mrs. W. L. Field, of Spring Creek, on Monday.

John W. Anderson and sons were visiting friends on this street on Sunday.

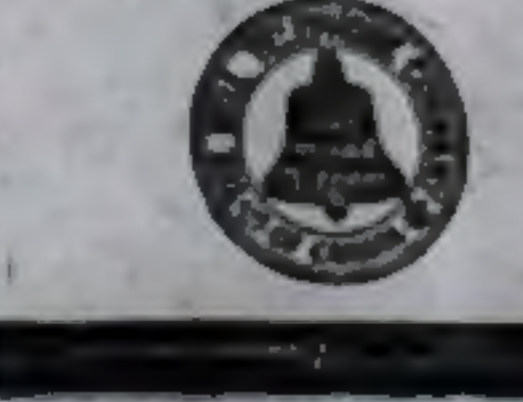

**Sales—\$1233
Cost—\$27.15**

The difference between a successful year and an unsuccessful one is only about 15%. Think how easily you can increase your sales 5%, 10% or 15% this year by planning to go after business systematically, by Long Distance!

Every day we receive new evidence from merchants in medium-sized towns, who have tried it for the first time and are surprised at their success.

Here is a recent case:—
"Number of sales, 17; number who subsequently bought, 27; total amount of sales, \$1,233; total cost of 44 calls \$27.15; percentage of selling cost, 2.2."

Try Long Distance selling — and convince yourself.

day at the home of his daughter, Mr. and Mrs. R. C. Mackie.

Mr. and Mrs. Ernest Grant were guests of Mr. and Mrs. Wm. Page, of Smithville, on Sunday.

Mr. and Mrs. R. C. Mackie were the guests of Mr. and Mrs. James Stevens, of Grimsby on Sunday.

Mr. and Mrs. James Mackie spent Sunday at the home of Mr. and Mrs. Joe Marlowe.

Mr. and Mrs. W. E. Field were guests of Mr. and Mrs. John Johnson on Sunday.

Senior fourth—Claude Sweet.
Junior fourth—Vernon de Montmorency, Sheila Coomber, Eleanor de Montmorency, Ernest Constable, Reg. Southwell, Alvin Ingram.
Senior third—Lyla Sweet, Phyllis Groff, Dorothy Southwell, Mary Pickett, Le Roy Pickett.
Junior third—Ashley Elliott, Joseph McMaster, Ruth Constable, Eddie McKluskey.
Second class—Lola Southwell, Marion Sweet, Tommy Kemp, Norman Hayward, Lloyd Ripenborg, Alex. Pickett.
First class—Lawrence de Montmorency, Frank Constable.
Senior Primary—Margaret Ducker, Reg. Sweet, Eric Hayward, Wilbur de Montmorency.
Junior Primary—Nelson de Montmorency, Mary Kemp, Gerlie Constable, Gerlie Pickett.
K. Roberta Edmondstone, teacher.

CANADA LARGEST NICKEL PRODUCER

Though nickel is not like iron and copper, one of the world's major industrial metals, it occupies a place of constantly increasing importance and, in so far as Canada's metal production is concerned, is second only to gold in the value of the annual output.

Canada's nickel industry had its beginning in 1857, in the discovery that certain mineral deposits at Sudbury, in Ontario, that had been taken up and worked for copper also contained nickel deposits rather than copper deposits.

Nickel was at this time, however, commercially speaking, a comparatively unknown metal for which there was no great demand—the world's annual consumption being only about 1,000 short tons—so that the history of the first few years of the industry is the record of an almost continuous uphill fight to find new users and a profitable market for the output.

Indeed, competition in the nickel field has always been keen, and though numerous companies have from time to time been formed to engage in the industry in the Sudbury district the only survivors are the two large corporations, the International Nickel Company and the Mond Nickel Company. At the present time these two concerns account for practically all of Canada's output (in round figures some 35,000 short tons valued at over \$19,000,000, constituting over 80 per cent of the world's requirements in 1924) except some small amounts recovered as by-products from the treatment of cobalt silvers.

The record production of 46,900 short tons was made in 1918.

Previous to the Washington Conference probably more than 50 per cent of this nickel went into armour plate for warships, but now the greater part of it finds its way into peaceful industries where it is put to many and diverse uses which may be grouped under four or five general headings, viz.: as a component of many alloys both ferrous and nonferrous of which the most important is nickel steel; as a surface coating for other metals; as a chemical or catalytic reagent; and as pure malleable nickel for the manufacture of cooking utensils, dairy equipment, and innumerable like articles made by rolling, forging, pressing or drawing the metal.

Not only to Canada but far the largest producer of nickel in the world, the reserves of nickel ores are vastly greater than those of any of her possible competitors and this together with the many other advantages she possesses gives her a predominant position in the world's nickel trade that is well nigh unassailable.

*Prepared under the direction of Dr. Charles Cammell, Deputy Minister of Mines, by Mr. A. H. A. Robinson, of the Mines Branch.

During the season of annual conventions of the Eastern and Western Ontario Dairywomen's Associations, it is inevitable to learn something of the methods by which Canada's great dairy rival, New Zealand, is improving the quality of her produce.

The necessity of governing the conditions of production on the farm as well as the situation in the factory has soon realized," says a writer in *Hoar's Dairyman*, "and the Government was asked to establish instructions which would spend their whole time with the patrons of the factory. These instructions visit regularly every two weeks the farms of all factory patrons. Where any trouble is found these visits are repeated frequently until the difficulty is cleared up. Generally abnormal conditions are traced to bad feed flavors (most frequently due to turpentine) but more frequently to contamination due to unsanitary growth caused by unclean milking machines, and also to the butter.

The cost of this visit nearly all co-operatives is the best large measure of dairymen whether they inspect themselves or not. Where the possible proof as to the quality of the milk is the system pays the salary of the inspector. The factory (milkery) pays all of the expenses of the instructor has his tent and equipment on his route. He refunds to the patrons on his route not less than \$50 and have either farm or factory experience."

Junior fourth—Honors—Eileen Well, Melvin Mitchell, Arnold Judd, Pans—Edna Roseman, Nancy MacPherson, Wilbert Zimmerman, Bonnie Walters, Douglas Bell, Charles Schwab, Hilda Roseman.
Senior third—Honors—Lloyd Knox, Gertrude Gordon, Pans—Keith Zimmerman.
Junior third—Honors—Louise Lawrence, Lillian Gordon, Molly MacPherson, Pans—Alice Lawrence, Eileen McBride.
Miss C. B. Marsh, teacher.

Junior team—Honors—Ronald McBride, George Cooper, Myra Eason, Marjorie Hill, Howard Reinko, Pans—Helen Cosby, Lola Hill, Elma Well, Ruth Knox.
First class—Honors—Jack Cooper, Pans—Edith Irish, Lloyd Moore.
Senior Primer—Johnnie Roseman, Lois Merritt, Emily Irish, Kathleen McPherson, Julia Cooper, Clara Huc-glass, Donald Smith, Harvey Eason, Norman Corie, Billy Cosby.
Junior Primer—Jack Robinson, Freddie Warner, Derek McBride, Miss Beattie Graham, teacher.

VINEMOUNT
There has been no feeding done in this section at time of writing. Last year many farmers were through by this date. Fall wheat has been badly hurt by the winter, and feed is beginning to get scarce.

Contractors are busy on the T. H. & B. railway widening the roadbed along the mountain side.

The Wentworth quarry is getting ready for a busy season. Stripping is being done at present.

Mrs. George Giddon is home from Hamilton City hospital.

The poultrymen in this section all report poor hatches for this season. The familiar hawk of the Spec man is heard once more along the Ridge road.

Hay at \$20 per ton and potatoes at \$4 per bag sounds good for those farmers who are fortunate enough to have some for sale.

Obituary

MRS. NORMAN COMFORT

Again the grim reaper has visited the community of Spring Creek and removed a highly respected citizen Mrs. Norman Comfort. She had been ailing for nearly a year with diabetes, but it was only Monday, April 12, she became the victim of erysipelas and passed away on Saturday, April 24. Her death was unexpected and was a shock to all who knew her.

She was born in 1864, and was the eldest daughter of Nelson and Mary Jane Summerman Lane, and was one of a family of ten children. Her old home was across the way from Lane's cemetery. She was married on October 20th, 1889, to her now sorrowing companion, Norman Comfort, of Spring Creek. She was a member of the Disciple Church.

The funeral took place on Tuesday, April 27, from her late residence to the Disciple church, Spring Creek, East, for service, and thence to Lane's cemetery for interment.

She leaves to mourn, her husband, one son, William, and two grandchildren: two sisters, Mrs. Curtis Hitchcock and Mrs. Frank Kinney; five brothers, Jacob, of Toronto, El, of Campden, Richard, Emerson and Freeman, of Twenty Road, One sister Mrs. Wesley Comfort and one brother predeceased her. The stricken family have the sympathy of the entire community in their time of sorrow.

SIDELIGHTS ON THE BIG STRIKE

Lack of train service isolates Grimsby.

Channel steamship services are greatly curtailed.

Work ceases in railway shops in Manchester district.

Lloyd's is besieged by people taking out strike risks.

Docks in Bristol deserted except for volunteer workers.

Long-distance milk and fish trains reach London on time.

Volunteers are running a few trains, street cars and buses.

Monetary loss to the country estimated at \$50,000,000 a day.

Trade is at a practical standstill at commercial docks in Grimsby.

Day is quiet in South Wales. Newspapers are published as usual in Cardiff.

Municipal power station at Stepney, London, curtails supply of electricity.

Union officials say the strike is complete, surpassing all expectations.

London traffic was in a hopeless jam at noon, twelve hours after the strike started.

Tramway service suspended at Bradford, but otherwise there is little dislocation of services.

Newspapers in London and some other cities fail to appear, and radio becomes chief source of news.

Ten thousand chemical workers in Chesapeake who work called out by their union reported for work as usual.

Edinburgh maintained a skeleton service of street cars and buses, and both evening newspapers were published.

Woolwich Arsenal, the nation's largest ammunition factory, was crippled when workers failed to report for duty.

Millions of workers faced their first day without wages. The public-houses in London and other cities were crowded.

Hundreds of railway clerks resume duties at Hull after telegraphing their union executive disapproving of the strike action.

Most of iron works in Bedfordshire and Buckinghamshire remained open, and agricultural work continues uninterrupted.

Every available aeroplane bound for France and every charabanc bound for Channel ports is filled with tourists leaving England.

Tram drivers in Portsmouth return to work after Mayor declared tram service would be normal whether or not there was a strike.

Striking dock workers in the so-called Communist district of London, around the East and West India docks, turned back many vehicles bearing people to the offices and shops.

In Glasgow and the Clyde-side the workers came out en masse as soon as the strike was announced. No newspapers are being issued there, but the shipyards are continuing work.

There was a remarkable response to the strike call in Manchester. All the tramsmen stopped work. No trains are running, and on mass as soon as the strike was announced.

News from the provinces shows that strike is being observed by Trades Union Congress industries, but that work is proceeding in other industries, including Clyde and Sunderland shipyards, Northampton boot factories and Leicester hosiery factories.

A Little Talk on Thrift

By S. W. Straus, President American Society for Thrift

A symposium on rules for personal success, recently brought to the attention of the public, gives emphasis to the value of the budget.

Some of America's most successful business men are quoted to the effect that they found it impossible to get ahead until they began budgeting their expenditures.

More and more the budget plan is gaining popularity with persons who are endeavoring to practice thrift for they find that with this system they are better enabled to keep within the bounds of rightful expenditures.

The American Society for Thrift, which has made free distribution of thousands of copies of its budget, reports a growing demand for it.

By the use of the budget plan a person is more apt to follow a well-balanced adjustment of savings and expenditures than would be the case if he drifted along from day to day.

Some people are inclined to save too much for their own best progress and development. Others find it hard to save anything at all. But by making out a budget and deciding definitely on the amount to be saved or invested and the amount to be spent for various items, it is much easier to give a practical, well-ordered life.

Many drift along from day to day and week to week without really knowing how much money they fritter away or how much of their expenditures is necessary. This is an inexcusable waste of time and money.

A business not knowing how the funds of his company or firm were administered.

No better advice can be given to those who would practice thrift than are embodied in these words: "Keep a Budget."

It is as necessary to one's individual progress as the compass is to the mariner.

Care of House Plant

The rubber plant which does not grow. The rubber plant is one of the easiest to grow in the house, but it requires regular watering, and, in the summer particularly, when it makes most of its growth, it should be given abundance of water.

In the winter, when it is making little growth, it does not need as much water. If the drainage is good, the cause of a plant not growing may be due to the pot being filled with roots, and, if so, it should be re-potted; if not watered regularly in the summer the roots might have dried up; it may have been watered too much or have been exposed to too low a temperature.

People who live in glass houses shouldn't play saxophones.

WHAT IS SUITABLE IN ART FOR CHILDREN

"Too many people are prone, too given to living by rule," says James Scott, noted American artist. "Art develops children's imaginations, and a great many more children than you would believe possible are almost entirely lacking in their imagination."

There is not a parent who has known imagination "lost" and "sublimed" who will not hasten to remedy a possible lack in his or her own child, by acting upon Mr. Scott's "hint." But some doubt may exist as to what is suitable in art for children.

Asked about a list of pictures upon which a child may be artistically nourished, Mr. Scott said that it is an easier task to choose pictures for children today than a few years ago.

The new movement in education is for developing the imagination, and all pictures for children, practically, are developed in fine design and good coloring, and stimulate the imagination. This is particularly true of illustrations in the modern children's books, he said.

Planned down to a small list of pictures that are artistic merit for the child mind, he dispelled an old illusion when he banished "The Horse Fair."

"The Horse Fair" is a powerful picture and a masterpiece," said the artist. "Nevertheless, it isn't a child's picture. There is nothing for the child to find in it. The Angelus could be on a child's wall forever and new beauties would develop each day. The scene is true to Millet's 'First Steps,' which portrays so beautifully the home life of the child."

"There should certainly be a Madonna on the child's wall. But let the child choose which one. All Madonnas appeal to children; there is no particular one better than another."

"There should be a marine, for all children love the sea and ships. And any one of Landseer's animal pictures might be added."

"Landscapes are a welcome addition, provided there are not too many. Old school pictures, for the land painted out of color. And the child's room, for his viewpoint."

"By all means, choose fairy pictures. Fairy pictures develop imagination. And choose a picture for its art merit, and because it tells a story. A picture may tell a story and yet be poor in line and color. Last of all, remember that a picture may be a great work of art and yet be horrible. No matter how great the artist or his pictures, such a creation has no place in the child's room, for his viewpoint."

FASHION HINTS

The object of most designers this season is to make their creations look like what they are not. One favored method of gaining a touch of individuality is to cut the frock so that it appears to be draped although it is not. These usually are very attractive skirts with the fullness brought around to the front. Many evening gowns are made with trains but these are not part of the skirt but hang from mid-back and are trimmed with feathers.

Capes are in full vogue for morning and afternoon wear both here and in London and Paris. This does not mean, however, that the straight loose coat has been entirely abandoned. For afternoon many of the capes are cut into points and edged with grosgrain ribbon. With coolie dress short capes are preferable. For evening long capes of velvet or taffeta with gathers forming a yoke are frequently seen.

No Beluges
Since fashion began a diatribe against the diaphragm, the makers of wraparound corsets have been busy. With the slightest figures these are sufficient to repress the diaphragm bulge, and flatten the back. For the heavier figure an under corset is provided with a cross section rather stiffly steamed and with wide sections of rubber. This is attached to the outer corset.

The Florida and California visitors and the stay-at-homes are clearly identified today by the contents of their wardrobes. The first have garden party frocks and the latter Madison Square Garden party frocks. The first are of cream, saffron, green, and pale yellow lace with fairly long skirts. They are accompanied by small sunshades with long handles. The latter are sport dresses, smart, tailored and trim, with special emphasis on exposure of hostility.

Shades Innumerable
The shades of modern hose are innumerable and hostery is no longer that hose take their complexion from the legs beneath rather than from the dye pot. Yet in conformity with the vogue in shoes, those shades known as opal grey, pearl grey, parchment, sauterne and oyster white are popular.

Not Unfolded
In these days of gossip it is perfectly en vogue to unfold a tale, but it is a distinct error to unfold a hat. Most of the Easter head coverings depend for chic and individuality on the way they are folded. One of the latest models in Taget straw has a deep fold in the high crown directly on front, secured only by a brief bow of grosgrain ribbon.

LOWER YOUR VOICE

By H. Addington Bruce
There are good many nervous, restless, excitable people to whom a psychologically instructed physician would give the advice:
Lower your voice a bit, speak more softly, less emphatically, in ordinary conversation.

Your present habitual manner of speech—high, tense, even hard and shrill—is perhaps to some extent a symptom of your nervous state. But also to some extent it contributes to keep you nervous.

It does this both directly and indirectly. Just as cheerfulness is increased by smiling and depression of mind by frowning, so is voice directly aided by the use of a low, soft voice and lessened by a loud high-pitched one.

Your own observation will satisfy you as to this. Note what happens when two people get into an argument. The louder they speak, the more violent their feelings become.

Not unspoken, there may be shouting down in antagonism to each other. The voice of one who first speaks in a loud tone is usually the one to gain command of the situation. The indirect effects of the voice on the mental state and the state of the nerves are no less important.

Fairly or harshly are unaccommodated and to disagreeable experiences by their daily contacts with other people. This is only because their people tend to create in other people voices of disapproval.

Most people so dislike loud voices to be unreasonably prejudiced as to their possession. Even those who have been bested so thoughtfully on who may react so unfavorably to what speaking as unwittingly to give loud and offence.

harmful both in social and in business. Those who speak in a more relaxed disinterested, unconscious of the moods and set-backs experience of sentiments of personal inferiority, apt to take root and grow.

Stage the loud speaker still further. More than this, they unwittingly make for nervousness. Medical psychologists often find them to be the chief determining factors in nervous gripes of a serious sort.

collo that, for the sake alike of health, peace, and happiness, there is real want for the warning:
Lower your voice.

RHUBARB — NOW AND TO COME
Before the rhubarb season is over will be so plentiful that we shall think we shall never want to taste it. However, we still have a little left for it and though we may lose it in a few days, we shall discover next January or February when the supply of other fruits begins to thin out, our liking for it will return. So here are some ways of preparing for both present and future consumption:

RHUBARB FRUITS
Two pounds rhubarb, 2 cups sugar, 1 cup water, 1 lemon, 1 egg (white), 3 tablespoons powdered sugar.

Wash rhubarb and peel if necessary. Cut in small pieces and put into baking dish with water and sugar. Bake in slow oven until rhubarb is tender, about forty-five minutes. Rub through a fine sieve and add juice of lemon. When cool fold in the egg white beaten stiff and dry on a platter with a wire whisk. Beat powdered sugar into white just before combining with rhubarb. Turn into fringed glass and let stand two hours pecked in three parts for ice cream or ice-cream cake.

Or the frappe can be frozen to a mush with stirring in two parts ice to one of salt and then packed in four parts of ice to one of salt until wanted to use. It will take about ten minutes to freeze "to a mush."

RHUBARB CUSTARD PIE
Two cups diced rhubarb, 1 cup sugar, 1 tablespoon butter, 1 tablespoon flour, 3 tablespoons water, 2 eggs, 3 tablespoons powdered sugar, few grains salt, plain pastry.

Four boiling water to cover over rhubarb. Let stand five minutes and drain. Put rhubarb into a smooth saucepan, add sugar and flour thoroughly mixed, butter and water. Bring to the boiling point, stirring constantly, and cook until thick and smooth. Add one whole egg and one yolk beat one whole egg and one yolk into a pie dish lined with plain pastry and bake until custard is firm to the touch. Beat remaining white of egg until stiff and dry on a platter using a wire whisk. Beat in powdered sugar and salt and spread over pie. Return to the oven for eight minutes to bake and color the meringue.

The oven should be hot when the pie is first put in in order to bake the crust. Reduce heat after ten minutes to bake the custard slowly.

BAKED RHUBARB
Twelve prunes, 1 cup boiling water, 1 cup sugar, 3 cups rhubarb cut in inch lengths.

Wash prunes and let stand 2 hours in cold water to cover. Remove stones and cut fruit in small pieces. Wash and cut rhubarb. Put rhubarb, prunes and water into a covered baking dish and cook in a moderate oven about thirty minutes. Add sugar and cook about thirty minutes longer or until rhubarb is tender. Remove cover about ten minutes before taking from oven.

The practice of combining rhubarb with strawberry and pineapple is now quite common. Conserve can be made with these same combinations. It can also be used with black raspberries or blackberries in making jam. It lends a good flavor to these fruits and reduces the seediness of the jam.

Rhubarb may be canned plain and next winter conserve can be made. Different combinations can be used for these winter-made conserves.

Combine with figs and lemons. A half pound of figs to a quart of cooked rhubarb is a good proportion. Cut the figs into small bits and cook until tender. To this add the juice and grated rind of one lemon.

Combine with orange and lemon. To each quart of rhubarb add one orange and one lemon cut into very small pieces. Use part or all of the rind. Simmer until the orange and lemon pieces are tender and the flavor well-mixed with the rhubarb. Then add a half pound of chopped walnuts. This can be used either as a sauce or cooked down to the consistency of a conserve.

STANDARDIZATION OF GRADES AND PACKAGES FOR MELONS

Another Part of Fruit and Vegetable Industry To Be Offered Benefit of Uniformity — Government Drafts Regulations and Will Submit Proposal to Growers

According to information received from U. E. McIntosh, Canadian fruit commissioner, suggested grades for cantaloupes and dimensions for a standard crate have been drafted by the commissioner and forwarded to the district inspectors for Ontario and for British Columbia, to be discussed with the growers in their respective territories, with a view to having the grades made compulsory, established as recommended grades. It is also proposed to have a crate standardised as a cantaloupe package in Canada.

Mr. McIntosh's action comes as a result of the demand by melon growers of the Burlington-Aldershot district and of British Columbia for the adoption of regulations governing the grading and packing of melons. Mr. McIntosh was approached by the Aldershot growers at the time of the Ontario fruit growers' convention in Hamilton early in March, and some weeks previous to that he had received a deputation of British Columbia growers who were working along the same line.

Great Rejoicing By Rheumatic Cripples

If So Crippled You Can't Use Arms or Legs, Rheuma Will Help You or Nothing To Pay.

Get a bottle of Rheuma today and wear a satisfied smile on your face tomorrow.

It's a remedy that is astonishing the whole country, and it's just as good for gout, sciatica and lumbago as for rheumatism.

It drives the poisonous waste from the joints and muscles — that's the secret of Rheuma's success.

But we don't ask you to take our word for it; go to the W. M. Stewart Drug Co., Limited, or any druggist, and get a bottle of Rheuma today; if it doesn't do as we promise get your money back. It will be there waiting for you.

Only Safe Way

Dealing with the matter, Mr. McIntosh writes: "Believing that grading and standardization of perishable food products is the only safe way for the grower to market such commodities, I can assure you this branch will do everything within our power to assist any movement of a practical nature which is in the interest of fruit or vegetable production. While I am fairly well acquainted with the marketing conditions which have arisen each season because of the movement of immature fruit, I feel that the introduction of compulsory measures is always better received and more strictly adhered to if the fruit growers themselves can be made to realize the injury which such practices bring about. I am pleased to note that this now appears to be the situation in the Aldershot-Burlington district in respect to melons or cantaloupes, and that they are sincere in their desire to have at least a measure of control."

Mr. McIntosh is awaiting the arrival of the petitions which have been signed recently by the growers, and is prepared to visit this district or send a representative here for the purpose of assisting in bringing the matter to a satisfactory conclusion.

Inspection Service

The commissioner is well pleased with the manner in which the shipping point inspection has been received by the growers. He believes that the rapid growth of this service indicates that the object which the department hopes to attain, namely, marketing on the basis of a government certificate, is gradually becoming established. He feels that if success is encountered, the department has done tremendous things for the fruit and vegetable consumers, as well as for the growers. Mr. McIntosh states that Inspector Jarvis and Blossinger are reasonably sure of being employed again this season in the Burlington district, and that the department is prepared to provide shipping point inspection service in any district where the tonnage moved is approximately sufficient to cover the costs of such service.

Can Expect Results

The growers of this district will be pleased with the statements made by the commissioner. Under the direction of Albert Scher, the growers of the Aldershot melon district have been very active recently in pushing for the establishment of grades and standard packages. They have been given every encouragement by District Inspector Gabel and by Inspector Jarvis, and apparently their efforts are to bear fruit.

RULES OF ROAD IN FAIR NIPPON

An American traveler now in Japan has sent back what he says is a poster issued and widely distributed by the traffic authorities of Tokyo. Its purpose is to keep the automobilists in better order—a problem nowadays in Far East as it is everywhere else. The heading of the poster is "Rules of the Road in Japan," which were published in The Standard a couple of years ago, but which, on account, no doubt, of their officiousness still in effect. They read:

At the rise of the hand of policeman, stop rapidly. Do not pass him by or otherwise disregard him.

When passenger of the foot hove in sight, tootle the horn trumpet to him melodiously at first. If he still obstructs your passage, tootle him with vigor and express by word of the mouth the warning, "Hi, hi!"

Beware of the wandering horse that he shall not take fright as you pass him. Do not explode the exhaust at him. Go smoothly by or stop by the roadside till he pass away.

Give big space to the festive dog that make sport in the roadway. Avoid entanglement of dog with your spoked wheels.

Go smoothly on the grease-mud as there lurk the skid demons. Press the brake of the foot as you roll around the corners to save collapse and tie-up.

There is a characteristic politeness about the Japanese code of instruction as reproduced above, but whether it is effective or not in making traffic safe for the pedestrian and the highway safe for Jap democracy is another question. We do know, however, that it is the part of wisdom always "to go smoothly on grease mud," or in the present weather on the slippery pavements.

After Every Meal

It doesn't take much to keep you in trim. Nature only asks a little help.

Wrigley's, after every meal, benefits teeth, breath, appetite and digestion.

A Flavor for Every Taste

PIN INDUSTRY

"One man's meat is another's poison" has long been an established maxim, and if hairdressers have profited by the modern fashion for bobbing and shingling, the poor hairpin manufacturer has suffered correspondingly. Perhaps more, for pin makers like the makers of mustard, depend largely on public waste for their profits. It was a millionaire mustard maker who admitted he made his money, not from the quantity of mustard eaten but from the quantity of mustard left on their plates, and the modern pin maker admits it is not the number of these useful adjuncts to the toilet that are, or have been, in use, but the number lost or thrown away that counts.

Miss 1925, with her shorn locks, no longer needs hairpins, and the abbreviated skirts and gossamer costumes now affected, no longer require so many ordinary pins. So the pin makers are in despair. One leading manufacturer declared that the bob-shingle fashion has cost his firm £10,000 yearly in hairpins alone. The 35 per cent. duty imposed by the Fordney tariff has ruined the export trade to America (which in pre-war days never made any pins at all).

Ordinary toilet pins are also in less demand, for people are more careful of them. Tailors and dressmakers are still the largest users of pins, but even they are much more economical, and no longer waste them. In the old days they used to throw away used pins at the end of the working day and start with a fresh supply next morning. Now the sweepers go round with a large magnet and collect all used pins for future service. The dressmakers' demand for brass pins used to be large but since the magnet-sweeping innovation they now use steel pins.

Even the old reliable "safety-pin" has gone out of fashion, for woman no longer seems to need them for her toilet. Safety pin makers blame modern lingerie changes, "one-piece" costumes, etc., which do not require pins. Woman no longer finds it necessary to "pin herself together"; she has so little to pin on, say the disgruntled makers.

Still sadder is the fate of the hatpin. So few are worn now, with the modern "cloche" hats and tight-fitting headgear, that hatpins are more or less a luxury or a novelty. One manufacturer sadly relates that only a few months ago a young woman entered his store, and seeing a trayful of hatpins, naively asked, "What are these things for?"

Vogue of Shagrene

In the seventeenth and eighteenth centuries, when it had a great vogue, shagrene, says the London Telegraph, was made from wild ass' skins, and the characteristic markings were introduced by rolling into it the hard seeds of cereals or lead pellets. The shagrene of today, however, comes from the skins of sharks, captured in Chinese seas, which are covered naturally with a mass of hard granulations. These roughnesses explain the name of the leather, which in derivation is identical with the French word "chagrin"; in the finishing processes they are filed smooth, and the beautifully-marked skin is dyed in a variety of colors. So strong is it that it destroys the steel files with which it is worked, and will withstand even malicious wear and tear. Old boxes and sword-cases made of shagrene, dating from the seventeenth century, are still in perfect condition, for the skin in its hardness resembles marble rather than any familiar form of leather. The present fashion for shagrene originated in Bond-street, and Paris and other capitals, which always defer to England where leather is concerned have been quick to adopt it for luxury articles.

Sixteen hour air plane service between New York and San Francisco seems likely within a few years.

HUMUS CONTENT OF COVER CROPS

Cover crops are those crops grown for the purpose of plowing under to increase the vegetable and humus content of the soil. These crops may be sown at any time during the growing season and a number of different varieties may be used. Humus is the one constituent in the make-up of a fertile soil that is most essential. So many things depend upon or are regulated by the humus content that we can safely say it is one of the foundation stones of producing crops. For instance the water holding capacity of a muck soil is larger than in any other type of soil. Humus is, correctly speaking a close black rubbery substance which is the result of the decomposition of vegetable and animal substances.

Ever since plants grow upon this planet nature has been using what we in modern times call a cover system. Crop residues and the dead remnants of one generation of plants go down into the soil and are decomposed by bacterial and chemical action and changed back into the elements and materials from which they were originally constructed. These materials are in turn used by other plants and so in turn each fulfills its proper destiny. Many plants produce an immense structure to bear a few seeds, the production of which is that plants sole excuse in life and when these seeds have been properly nourished and matured the rest of the plant structure falls down in ruin and decay and thereby furnishes a home for its progeny better than it found it. This process perpetuated through ages of time have produced the fertile plains and prairies of today.

Cropping systems which have been employed by farmers, fruit growers and vegetable growers of the past years have been such that this balance of nature was somewhat upset. Clean cultivation has prevented the accumulation of plant residues and an other means must be employed to replace these materials. Manures of various kinds have been used to supply the decreasing humus content, but the price of this material has increased so much as to be almost prohibitive.

Green manures and cover crops along with commercial fertilizers are the only means by which many gardeners can maintain their soil fertility. Cover crops which are used to supply the humus content must possess certain characteristics. These may be briefly enumerated as follows:

1. Make rapid growth.
2. Be fairly easy to start.
3. Seed easily procurable.

Crops most useful for these purposes are rye, sweet clover, vetches, red clover, oats and peas, cow peas, rape, buckwheat and millet.

All clovers, vetches and peas are legumes and as such have the power of gathering nitrogen directly from the air. Rye, rape, buckwheat, etc., have not that power and their uses do not increase the fertility of the soil to the same extent.

The plants which belong to the clover family have associated with the small bacteria which lives on the clover roots, that is, where the soil is not acid. These bacteria attach themselves to the small roots and form what we ordinarily call nodules, they are in reality galls. These bacteria rob the plant of some of its food material and also gather nitrogen from the air and which after digestion is converted in deposited in these galls or nodules in the form of nitrate which the plant then uses for its own benefit. Here we have an example of co-operation in nature, these bacteria live on the plant and gather nitrogen from the air which the plant in turn makes use of—each lives on the other for the mutual benefit of both. This then explains briefly why clovers are such good soil builders.

These beneficial bacteria do not associate with any other class of crops. One analysis of the sweet clover crop on one acre of ground showed a total of 228 lbs. of pure nitrogen in the roots and tops in one season's growth. This is equal to the nitrogen in 1500 lbs. of Nitrate of Soda.

Sweet clover stands first and foremost among plants as a soil builder, alfalfa and red clover are close followers.

For average conditions not less than 20 lbs. of seed per acre of sweet clover or alfalfa should be sown and 15 lbs. of red clover. Seed should be sown as early in the growing season as cultivation of the regular crop will permit in order to get a fair top by freezing up time in the fall. In orchards where it is desirable to cultivate up to nearly the first of August it is sometimes difficult to get sufficient moisture to germinate the seed and so the cover crop does not get a very big start before winter sets in. It is not advisable to sow too soon because if the plants get too big they rob the trees of too much moisture and the fruit crop suffers. One needs to cultivate the ability of being a good guesser to determine the best time each year to sow the cover crop. Cover crops should be plowed down early in the spring to prevent them from robbing the trees of too much moisture.

Piles Go Quick

Without Salves or Cutting
Thousands who have piles have not learned that quick and permanent relief can only be accomplished without internal medicine. Neither cutting nor internal medicine will remove the cause.

Had circulation causes piles. There is a complete stagnation of blood in the lower bowel and a weakening of the parts. Dr. J. S. Leonard was first to find the remedy and called his prescription HEM-ROID. Dr. Leonard tried it in 1000 cases with the marvelous record of success in 98 per cent. and then decided it should be sold by druggists everywhere under a rigid money-back guarantee.

Don't waste any more time with outside applications. Get a package of HEM-ROID from the Stewart Drug Co. today. It has given safe and lasting relief to thousands and will do the same for you.

No ground should be left bare to go through the winter except of course the heavy soils which are plowed last thing before they freeze up. Corn, potato, cabbage ground and any other ground from which the crop has been removed early enough to leave a month or more of growing weather should be seeded with some kind of crop. Where the crop is removed in midseason rape and buckwheat can be used where it is desired to plow down in fall and sweet clover or rye and vetches where it is to be left to the following spring. Rye is sown at the rate of from 6 to 8 pecks per acre and vetches at the rate of 4 pecks per acre when sown alone. A mixture of

5 pecks rye, 2 pecks hairy vetches and 5 lbs. sweet clover will give a good heavy stand. Where this mixture is used it should not be sown later than the first of September at the very latest. Rye only should be sown after October first in most years.

In a little more than two years a sealed bottle floated 8,000 miles across the Pacific.

An aluminum face mask has been perfected by a Norwegian that cures insomnia.

On the recent air plane trip around the world, 19,500 gallons of gasoline were used.

Let Your Taxes be Spent on Mileage instead of on Upkeep

Have you ever stopped to figure what proportion of each year's paving appropriation is spent to maintain non-permanent pavements? And do you realize that every dollar thus spent for upkeep means that much less mileage of new paving each year?

Concrete pavements are permanent. They need no costly upkeep. They staunchly withstand the heaviest traffic and provide a smooth, safe, comfortable driving surface for every type of vehicle.

The more a community adds to its mileage of concrete pavements, the less it needs to spend each year for upkeep. Each ensuing year's appropriation becomes increasingly an appropriation for NEW ROADS which, built with concrete, save money for the taxpayer and reduce the cost of motoring.

Home Comfort For Mother

When Mother's work is done for the day, then it is time for her to have all the comfort she can get.

MOTHER would appreciate a gift of a pair of our delightfully comfy slippers. They are especially easy and restful for tired feet.

Perhaps MOTHER needs a new pair of walking shoes. If this is the case, we can supply them. Our stock in this line is very complete and we are sure to satisfy her.

CONFERENCE TO BE HELD ON MAY 19TH

Toronto, May 1.—Every conference of the United Church of Canada has decided to meet during May. Centres and dates of meeting have been arranged and in most cases buildings to accommodate delegates have been engaged. All the enterprises of the church will be considered and activities of congregations reviewed from statistical summaries and in discussion. Memorials from presbyteries will be deliberated on and these and other important matters will be referred to the general council, which meets shortly after conference concludes. Settlement committees, which have to deal with pastoral care on request of ministers or congregations, will meet just prior to the conferences.

British Columbia conference, convening in St. Andrews church, Vancouver, and Montreal and Ottawa conferences, called to meet in Dominion church, Ottawa, will be the first to assemble. All ministers attend and lay representatives in equal numbers are now being elected by the church's lower courts.

Toronto conference will be held here on May 13, Hamilton conference in Hamilton on May 19 and London conference in Stratford on May 24.

Here and There

Salmon exports from British Columbia amounted to 1,571,000 cases, the record for several years past. Shipments in 1924 were 1,525,000 cases; 929,000 cases in 1923; 794,000 cases in 1922 and 930,000 cases in 1921.

For the first time in Canada, a sport known as the "mountain glissade," was performed at Revelstoke, B.C., on Friday, January 29, before hundreds of visitors to the start of Revelstoke's twelfth winter carnival. "Glissading" consists of flying down rough uneven mountain sides on skis.

From August 1, 1925, to January 21, 1926, 2,182,198 bushels, or about one and a half per cent. of the 195,637,112 bushels of grain shipped by the Canadian Pacific Railway went by the all-rail route. About one-eighth, or 30,216,134 bushels travelled through the port of Vancouver and the balance of 85 per cent was shipped via Fort William.

Five hundred Montreal school children will give a concert on the concluding night of the triennial conference of the National Council of Education, to be held in Montreal from April 6 to 9. The speaker for the occasion will be Sir Walford Davies, well known authority on national and school music.

Under the auspices of the French Government, the French universities and Hon. Philippe Roy, commissioner-general of Canada in France, a tour through France has been arranged for this summer, starting in Quebec on May 26 with the departure of the Canadian Pacific liner Empress of Scotland.

Pulp and paper exports from Canada during 1925 were valued at \$154,555,951, as compared with \$139,491,465 for the previous year. Newsprint production for 1925 was estimated at 1,516,000 tons, as compared with 1,352,994 tons for 1924. This is twice the newsprint produced in 1924.

Good Growth In Dairy Export

Exports of dairy products from Canada have been increasing rapidly during the past three years. Dairy Commissioner J. A. Ruddick told the Ontario creamerymen at their annual meeting at the King Edward Hotel, Toronto, recently. "In 1923 we exported 25,500,000 pounds," stated Mr. Ruddick "this year the total will run over 57,000,000."

D'Arcy Scott, secretary of the Na-

tional Dairy Council, predicted a co-operative organization for the shipment of dairy produce abroad in the near future. This should lead to lower ocean freight rates, in his opinion, and eventually to co-operative marketing. Mr. Scott claimed that the Australian trade agreement had been responsible for lowering the price of butter fat in Alberta by two cents per pound. He admitted that practically no Australian butter had come into the country, but he believed that the fact that it might come in was being used as a lever to keep down prices.

In the opinion of Dr. G. L. Machay of Chicago, producers of dairy products are about 20 years behind the manufacturers in the matter of economy production. He advocated greater use of sweet clover as a pasture plant, and specializing in one breed of cattle in a community, as two examples of how farmers might lower the cost of production.

This is the largest convention in the history of the Ontario Creamerymen's Convention. Charles Johnston, London, presided. The financial report showed a balance of slightly over \$360.

Changes In Baseball Rules for Year 1926

Note one thing very carefully. Note a word of the rule about the use of a

If the batsman gets to first on a wild pitch it will be an error in the future. It should always have been. There is no reason why a pitcher should not stand for anything which puts a batsman on first base.

BUTTER COLOR

Anatto seeds have a red coat which is easily washed off with water and a little lye to make cheese coloring. Oil is used instead of water in making the coloring for butter. This part of the work is done in special laboratories. The liquid, when ready for use, is so rich in color that only a little is needed to give butter or cheese any shade of yellow that the makers desire.

One of the most important problems that today confronts a manufacturer of nationally advertised products

Of course the fact was not advertised that they had to make abnormal profits on other merchandise to repay them for the losses they sustained selling our product at a cut rate price or at a ridiculously low margin profit.

Here and There

H. B. Beaumont, assistant steamship general passenger agent, has been appointed assistant to the steamship passenger traffic manager of the Canadian Pacific Steamships, according to recent advices from the head offices of the company.

Production on Nova Scotia farms in 1935 amounted to approximately \$40,420,000, as compared with \$435,000 in the previous year. Its making up this total were: Dairies, \$10,200,000; livestock, \$2,200,000; field crops, \$12,700,000; poultry products, \$1,220,000; fruits and vegetables, \$8,000,000.

A railway car, originally built as an observation car for the Canadian Pacific Railway, was used as "chapel ardente" and funeral coach to transport the remains of the Queen Mother of Italy. This was used in hospital service during the war and was sold, with others, to the Italian State Railways at the armistice.

Strange scenes are laid in Canadian west on account of hoar frost and snow. The trees and shrubs are covered with snow forming strange white animals in Kicking Horse Pass region. A number of photographs were taken recently in this neighborhood showing grotesque and terrifying figures in the form of prehistoric animals.

The writer has been interested in this price-cutting mania for several years, and has to some extent studied the psychology of the price cutter.

Phone 410

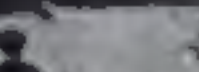

Sixty-four years ago, when George Simpson was making the first overland tour around world, he came across some springs on the western slopes of Rocky Mountains which the Kootenay Indians frequented on account of their curative properties.

As the white settlers came to the Wild Horse Creek Gold Field these came to be called The Hot Spring, and became known as Hot Springs, and are now one of the best resorts in the West.

more Road, which are also called Esk-die-Rak-Gra-nes, this being the

stom ills afflicting the entire
post office address. These Springs
are also highly curative, and have
also a neighboring bungalow camp
which was erected by the Canadian
Pacific Railway, and is operated
very successfully by the Misses
Armstrong. The Government Hot
Springs were for many years known
as the Sinclair Hot Springs, being
named after James Sinclair, an old
time pioneer, who is the first known
white man to have crossed the Sin-
clair Pass in 1842. The virtues of
these Springs were known not only

to the Indians but to the animals and it is credibly reported that in the old days bears used to bath their paws in the waters to secure relief from rheumatism. While there is a natural confusion through the duplication of names, both resorts are rapidly increasing in popularity, chiefly owing to the increase in automobile traffic through the Rockies.

We can make them in any figures to total any amount you desire. They are printed on eyeletted shipping tags and are the handiest ever. Many growers now use them and more are coming to them.

[illegible]

1000 for \$5.00

THE INDEPENDENT

Telephones 23 or 36

H. B. Beaumont, assistant steamship general passenger agent, has been appointed assistant to the steamship passenger traffic manager of the Canadian Pacific Steamships, according to recent advices at the head offices of the company.

Canada's agricultural growth during the past quarter of a century is well illustrated by figures compiled by the Dominion Government, which show that during the past year field crops had an estimated value of \$946,166,000, as compared with \$196,673,000 in 1900.

Production on Nova Scotia farms in 1935 amounted to approximately \$40,420,000, as compared with \$36,435,000 in the previous year. Items making up this total were: Dairy, \$10,200,000; livestock, \$3,200,000; field crops, \$12,700,000; poultry products, \$1,220,000; fruits and vegetables, \$3,000,000.

A railway car, originally built as an observation car for the Canadian Pacific Railway, was used as a "chapelle ardente" and funeral coach to transport the remains of the late Queen Mother of Italy. This car was used in hospital service during the war and was sold, with others, to the Italian State Railways after the armistice.

Strange scenes are laid in the Canadian west on account of hoarfrost and snow. The trees and shrubs are covered with snow forming strange white animals in the Kicking Horse Pass region. A number of photographs were taken recently in this neighborhood showing grotesque and terrifying figures in the form of prehistoric animals.

Radium Hot Springs In The Rockies

Sixty-four years ago, when Sir George Simpson was making the first overland tour around the world, he came across some hot springs on the western slopes of the Rocky Mountains which the local Kootenai Indians frequented on account of their curative properties. As the white settlers came in after the Wild Horse and Gold Rush, one of the first to be called The Fairmont Hot Springs, and became a well known landmark on the Government road from Lake Windermere to Cranbrook. Mr. H. H. Holland, purchaser of the place, had a bathing facility, and two years ago made excellent improvements in connection with his development of a bungalow camp. The waters on analysis proved to contain a higher percentage of radium in solution than any of the waters of the American Con-

Arkansas. In addition to valuable curative deposits of magnesium and radium, the Canadian Pacific Railway has obtained right of way through his property in consideration of calling their station Radium and these Radium Hot Springs now attract many tourists, the camp having a capacity for seventy persons.

A special bath is now being constructed for the Indians, under the superintendence of Louis Arbel, who is the Canadian Indian folk Kootenai Chief. There is a tennis court, a large swimming pool surrounded by a very regularly clean dress-room. There is a tennis court and horses with guides are available for riding the neighboring territory while large numbers of motorists visit the Springs during the summer months. Mr. H. H. Holland has the intention of making this an all-year resort, as the waters have a temperature of 120° and never freeze.

The only fish in the lake is a rival that the Government has created for the Government, the Spent-Windermere Road, which are also called Radium Hot Springs, this being the post office address. These Springs are also highly curative, and horses, which are used by the Canadian Pacific Railway, and is operated very successfully by the Misses Armstrong. The Government Hot Springs were for many years known as the Sinclair Hot Springs, being so named by James Sinclair, an old time pioneer, who is the first known white man to have crossed the Sinclair Pass in 1842. The virtues of these Springs were known long ago to the Indians, and the animals of the Indian tribe, it is credibly reported it is the old days bears used to bathe their paws in the waters to secure relief from rheumatism. While there is a natural confusion, through the duplication of names, both the name and the water, the popularity, chiefly owing to the increase in automobile traffic through the Rockies.
